

#### Where does the information come from?

The modem for prisma CLOUD links a prisma therapy device to the Cloud. Twice a day for a short time the device establishes a wireless connection to synchronize the latest information automatically. The connection takes place only when the modem is attached and the device is connected to electric power. During treatment the device always operates in Airplane Mode.

Transmission is limited to technical data such as the serial number of the device and information about the therapy itself, which helps you to ensure safe and effective care during treatment. No personal data are captured or transmitted.

#### Are the data safe and secure?

Data protection and security, especially for medical information, are very important. That's why we have developed a protection concept that gives patient privacy top priority and prevents unauthorized access.

Access to the stored data is always limited to the doctor and patient. Neither providers nor we as the manufacturer have access to data in the Cloud. Of course prisma CLOUD, which is a medical technology product with a CE sign, conforms to the requirements of the EU GDPR – just as you would expect from a trustworthy manufacturer.

## Our Telemedicine Solution for You and Your Patients

With prisma CLOUD you can manage your patients' treatment simply, flexibly and securely. Let us support you so that you can concentrate on what's most important – the optimum care of your patients.

prisma CLOUD automatically ensures that you have access to all relevant therapy parameters at all times. If necessary, you can react immediately and adjust therapy settings via the Cloud. Furthermore, you can be certain that you'll have upto-date information about the course of therapy. Fully automatic, from anywhere at all. This capability opens up new opportunities for increased efficiency in patient care not only with prisma sleep therapy devices but with prisma VENT too.

# AHI, Compliance, Leakage and much more.

All relevant therapy information is provided to you. The prisma CLOUD Dashboard clearly presents the most important parameters so you can see which patient in particular benefits from your attentiveness. You can filter and configure the view to help you recognize the most significant patients at a glance.

In the expanded view you also receive details that assist you in assessing the therapy.

The report over a specified period of time can be generated directly in the Cloud and stored, sent or printed in PDF format. Benefit from the documentation quality, which is comparable with prismaTS.

prisma CLOUD is developed continuously and enhanced with innovative functions. The advantages come automatically and you don't have to worry about updates.

## For Your Patients – my.prismaCLOUD

prisma CLOUD is a help not only for you. Give your patients the opportunity to see the quality of their sleep and the effectiveness of treatment. Via my.prismaCLOUD.com, your patients are always informed of how long they've slept and how deep their sleep was. In addition, my.prismaCLOUD provides information about the mask fit and any still present apnea and other sleep events. The indicators for AHI, leakage, compliance and deep sleep were especially designed to give patients a simple and comprehensive view of the data. my.prismaCLOUD is optional. You can decide whether to make this product available to your patients.
